

## Résine : TOUGH

### Caractéristiques :

#### Haute Résistance

Cette résine a été conçue pour simuler le plastique ABS et présente une résistance à la traction et un module d'élasticité comparables. Cette résine solide, résistante à la rupture et pouvant supporter des déformations ou des contraintes importantes, convient parfaitement au prototypage.

### Applications:

- Assemblages à emboîtement élastique
- Autres types d'assemblage
- Prototypes résistants
